

# LIBERTY OPTHALMOLOGY

RESTYLANE® adds volume and fullness to the skin to correct moderate to severe facial wrinkles and folds, such as the lines from your nose to the corners of your mouth (nasolabial folds).

RESTYLANE® works immediately by adding volume to smooth away wrinkles. A clear gel formulation of hyaluronic acid, RESTYLANE® is specifically formulated to act like your body's own hyaluronic acid. So, you can use RESTYLANE® to visibly reduce moderate to severe facial wrinkles and folds for a younger-looking you.

## Where can RESTYLANE® be used?

RESTYLANE® can be used to add volume and fullness to the skin to correct moderate to severe facial wrinkles and folds, such as the lines from your nose to the corners of your mouth (nasolabial folds or laugh lines).

RESTYLANE® can also be used in other moderate to severe facial wrinkles such as lipstick lines, the area just below the nose and above the upper lip; the corners of the mouth; and marionette lines, the area that extends downward from the corners of the mouth to the jaw line.

## How long does treatment last?

RESTYLANE® instantly adds volume to help restore youthful contours, so you'll see results immediately following your treatment. There is little to no downtime.

In a clinical study of laugh lines (nasolabial folds), at least 95% of patients treated with RESTYLANE® continued to see results for up to 18 months after initial treatment when patients returned for a follow-up treatment at 4.5 or nine months.

## History and safety

RESTYLANE® injectable gel is the world's most studied wrinkle filler with more than a decade of use. *Restylane* has a well-defined safety profile and is approved for the treatment of moderate to severe facial wrinkles and folds, such as the lines from your nose to the corners of your mouth (nasolabial folds). RESTYLANE® is indicated for mid-to-deep dermal implantation.

RESTYLANE® is the #1-selling wrinkle filler in the world and has been used in more than 10 million treatments in more than 65 countries worldwide.\*

RESTYLANE® is made of a clear gel formulation of hyaluronic acid. Biocompatible with the human body, these products are eventually broken down naturally.

After your treatment, you might have some swelling, redness, pain, bruising, or tenderness. This will normally last less than seven days.

RESTYLANE® should not be used by people with previous bad allergies, particularly to certain microorganisms known as gram-positive bacteria; by people with previous bad allergies to drugs who have required in-hospital treatment; or by people with bleeding disorders. Injections should not be made anywhere except the skin or just under the skin.

To avoid bruising and bleeding, you should not use RESTYLANE® if you have recently used drugs that thin your blood or prevent clotting.

\* Includes Q-Med AB HA products not available in the United States.

**RESTYLANE® (continued)**
